

iF3 Technical Officials Committee — 12 November 2025

Date	12 November 2025
Format	Video call
CF3	Simon Damborg, President
iF3 Technical Officials Committee	János Orvos, Laurent Selleslaghs

WHY WE MET

Ahead of the 2025 World Championships, the iF3 Technical Officials Committee met on the shared technical-official platform, which CF3 maintains.

WHAT WE TALKED ABOUT

How support for the platform is divided, with CF3 handling software issues and the committee handling content and event enquiries. The two-step TO1 certification (an online test followed by an in-person evaluation) and how to prompt candidates to complete the second step. Integration with Circle21 so event registrations update the platform automatically. Moving movement standards out of static PDFs into a digital database with a way to give feedback.

WHAT IT MEANS FOR MEMBERS

A clearer path to TO1 certification, and movement standards that can be corrected quickly when officials spot a problem.

WHAT HAPPENS NEXT

CF3 is adding automated reminders for candidates who pass the online test, feedback and change-request buttons on the standards database, and continuing the Circle21 integration. The immediate priority was a stable platform for the 2025 World Championships.
