

iF3 Technical Officials Committee — 27 October 2025

Date	27 October 2025
Format	Video call
CF3	Simon Damborg, President
iF3 Technical Officials Committee	Laurent Selleslaghs

WHY WE MET

CF3 builds and hosts the technical-official management platform used internationally through iF3. This call planned its next version.

WHAT WE TALKED ABOUT

Moving the platform to a faster second version with automated technical-official training, testing and status updates. Unifying officials' experience data across national federations so competency can be verified for international events. Using CF3's own data as the proof of concept for a shared iF3 database of officials. How the platform's upkeep can be sustained over the long term.

WHAT IT MEANS FOR MEMBERS

Canadian technical officials' certifications and event history are recognised internationally, and the work CF3 does here sets the standard other federations adopt.

WHAT HAPPENS NEXT

Current users move to the new version once it is verified, CF3 is drafting a functionality and requirements document for the committee, and will present the platform at the committee's next meeting.
