

Domestic Development Committee — record of decisions

Meeting of 26 February 2025. Virtual.

Decided

Committee minutes and official documents will be published online. The committee agreed that publishing its records is a matter of public accountability. This record of decisions exists because of that resolution.

Membership recruitment will prioritise clubs and committees. The committee's reasoning was that athletes are drawn in by competition on their own, whereas club registration needs deliberate outreach.

The technical officials pathway was endorsed in the four-level form the Technical Officials Committee had set six days earlier, with an additional level for officials working toward IF3 international standard. Recruitment is to target former athletes and previous event volunteers, and any sanctioned event using IF3 movement standards is to be offered training support at no charge.

Responsibility for CF3's social media was assigned to a committee member, with content priority given first to the national championship and technical-official recruitment, and second to club benefits and athlete registration.

A content calendar is to be produced so that the same core messages carry across blog, video and social channels.

Noted

The committee created a shared document for each committee's meetings, and observed at the time that its approach to storing shared credentials raised security concerns. CF3 has since moved governance records onto this register.

A record of decisions taken. The minutes of this meeting are held for the committee.
